Informatics undergraduate student with practical experience in software development gained through internship and project-based learning. Proficient in developing web and mobile applications, analyzing system requirements, and applying artificial intelligence and machine learning techniques to solve real-world problems. Proven ability to work collaboratively in professional teams, lead initiatives, and communicate effectively through internship, teaching assistant, organizational, and competition experiences. Passionate about building scalable, data-driven, and impactful technology solutions.

Education Level

Institut Teknologi Del - Toba, North Sumatra, Indonesia Aug 2023 - Sep 2027 (Expected)
Bachelor, 3.31/4.00

- Awarded Best Male Student (University Level) – Even Semester, Academic Year 2024/2025.
- First Place Winner – HIMASTI Programming Competition 2025.
- Third Place Winner – HIMASTI Datathon Competition 2026.
- Selected as University Representative in ONMIPA Biology Regional Competition 2025.

Work Experiences

PT Telkom Infrastruktur Indonesia - South Jakarta, Indonesia Jun 2026 - Aug 2026
Full Stack Developer Intern

- Developed a web-based Network Quality Intelligence (NQI) dashboard using Laravel, Vue.js, and MySQL
- Built data import and processing modules to transform exported network monitoring data into actionable insights.
- Developed RESTful APIs, interactive dashboards, automated briefing summaries, and PDF/Excel report generation.
- Collaborated with cross-functional team members to deliver a scalable full-stack web application.

REDDI Indonesia - Jakarta, Indonesia Jun 2026 - Present
Full Stack Developer Intern

- Developed REDDI Shopper Management System using Laravel 12, Vue.js, Inertia.js, and PostgreSQL.
- Designed and implemented database architecture, ERD, migrations, and role-based access control.
- Developed shopper management features including CSV/XLSX import, duplicate detection, WhatsApp number normalization, and audit logging.
- Built operational modules for project management, assignment tracking, payment processing, and reporting.
- Collaborated with stakeholders in requirement analysis, sprint planning, client reviews, and system development.

Del Institute of Technology - Toba, North Sumatra, Indonesia Sep 2025 - Dec 2025
Teaching Assistant – Computer Networks

- Assisted in delivering computer networking laboratory sessions for undergraduate students.
- Guided more than 50 students in configuring routers, switches, and network devices.
- Supported students in understanding IP addressing, subnetting, and network communication concepts.
- Provided technical assistance and troubleshooting during laboratory activities.
- Collaborated with lecturers to prepare learning materials and practical exercises.

Del Institute of Technology - Toba, North Sumatra, Indonesia Feb 2026 - May 2026
Teaching Assistant – Data Structures and Algorithms

- Assisted in teaching data structures and algorithms for undergraduate students.
- Mentored more than 50 students in programming, debugging, and problem-solving techniques.
- Guided students in implementing fundamental data structures and algorithmic solutions.
- Supported laboratory sessions and coding exercises to improve programming proficiency.
- Helped students analyze algorithm efficiency and apply structured computational thinking.

LPPM Del Institute of Technology - Toba, North Sumatra, Indonesia Sep 2025 - Dec 2025
System Analyst & Developer

- Conducted system requirement analysis and gathered business requirements from stakeholders.
- Designed database architecture, system workflows, and data management processes.
- Developed a web-based information system to support proposal submission and research administration.
- Implemented features for data management, reporting, and workflow automation.
- Collaborated with stakeholders throughout planning and development

- Analyzed organizational requirements and designed system architecture for operational data management.
- Developed integrated web and mobile applications to improve accessibility and administrative efficiency.
- Designed and implemented database structures and data processing workflows.
- Built features for member data management, reporting, and information access.

Organisational Experience

Leadership and mentoring program aimed at supporting first-year students in their academic and personal development.

- Mentored first-year students in academic adaptation and personal development
- Provided guidance on discipline, responsibility, and campus life

Committee responsible for organizing and managing the Informatics Student Association election process.

- Led event planning and execution by coordinating committees and managing event flow
- Ensured smooth execution and adherence to schedule

Student organization representing Informatics students at Del Institute of Technology, responsible for supporting academic, professional, and student development activities.

- Managed budgeting, financial records, and reporting for organizational activities
- Ensured accountability and proper allocation of funds

Skills, Achievements & Other Experience

- **Achievements** (2024): Awarded Best Male Student, Pniel Dormitory – Academic Year 2023/2024.
- **Achievements** (2025): Awarded Best Male Student (University Level) – Even Semester, Academic Year 2024/2025.
- **Projects** (2025): Developed TrushCare, a smart waste classification system using computer vision and machine learning approaches in GEMASTIK Smart City Division.
- **Projects** (2026): Developed a computer vision model for rice leaf disease classification using Convolutional Neural Networks (CNN), including image preprocessing, augmentation, and model evaluation.
- **Projects** (2026): Independently developed a Laundry Management Mobile Application, handling both frontend and backend development. Designed features for order management, transaction tracking, and operational workflow automation to improve administrative efficiency.
- **Technicak Skills:** JavaScript, TypeScript, Python, PHP, Java, Kotlin | React.js, Vue.js, Node.js, Laravel | MySQL, PostgreSQL | PyTorch, Scikit-learn, NumPy, Pandas | Git, RESTful APIs | Mobile Development (Android)
- **Languange:** Indonesian (Native) | English (Intermediate)
- **All Certificates** 📄: A collection of certificates obtained from academic achievements, competitions, and organizational involvement.
